Dear Sri Nalini Doshi,

Sub: Highly advanced Fire Safety Equipments and Systems introduced for the First Time in India as Import Substitute

Please refer to your letter dated 8th January 2000, the contents of which have been gone through at our end.

We are once again thankful to you and your Organisation for inviting our team to Vadodara on 23rd December '99 for witnessing live demonstration of various advanced version of Fire Fighting equipments.

We are quite impressed with the performance of the DCP based Automatic Detection and Self Extinguishing System suitable for Floating Roof Tanks which was physically demonstrated on the 56 M dia crude oil tank at our Gujarat Refinery. Your system worked flawless and was very effective within spilt seconds. The equipment and system also appear to be quite simple and easy for installation and maintenance.

We are also thankful to you for inviting us to your Factory site for witnessing the live Fire Fighting System on mock-up storage tanks. All the systems which we witnessed worked satisfactorily and gave us much desired confidence that we have the capability in our country to develop sophisticated and most modern Fire Fighting equipments. Particular mention may be made of the Portable Multi-Purpose Long Range Monitor, Elevated Remote Controlled Long Range Water-Cum-Foam Monitor of 1000 & 2000 GPM capacity which will have wide applications in Oil Terminals and LPG Storage facilities. Other equipment like High Expansion Foam Flooding Generator for Tank Farm Dykes is also interesting.

We suggest that the demonstration platform may please be maintained so that similar live fire and fire fighting demonstration may be conducted periodically for the benefit of officers of the oil industry, besides being used for imparting training to them.

Wishing you all the success in your various innovations.

With regards ,

Yours sincerely,

(B.K. MITTAL)

Shri Nalin Doshi,
