Sub: Demonstration of your newly developed Fire Safety Equipments & Systems including high volume long range multiple type monitors.

Dear Mr.Doshi:

Thank you very much for the kind invitation extended to us for witnessing the live fire demonstration of your newly developed products on 23rd Dec. 99.

At the outset let me admire you for your bold effort in arranging such a demonstration on live fire, you and your team deserves all the appreciation which is also a good trend in Indian Fire Protection Industry. Alternative to Halon 1211 system for floating roof oil storage tank was quite effective and useful replacement to ozone depleting substances.

The performance of the Elevated Remote Operated High Volume Long Range Monitor of 1000 & 2000 GPM received special appreciation. This equipment would go a long way in fighting of tank fires, column fires, POL Terminals and Jetties and also in Defence Services. So kindly give us the budgetary quote for 475 GPM, 750 GPM, 1000 and 2000 GPM capacity.

The other equipments demonstrated by you viz: Four-in-one Multi Purpose Nozzle, Automatic Foam Flooding System for conversion of manual foam pourer system, ISI Marked Monitor fitted with Aqua Foam Nozzle with pick-up tube and accessories, High Expansion Foam Flooding Generator etc. where also highly appreciated.

I once again thank you for the kind hospitality and wish VIMAL all the success in their endeavours.

Yours Sincerely,

(H.S. KAPARWAN)
