SUB: Launching of High Advanced and Unique Fire
Fighting Equipments and Systems.

Dear Sir,

It was indeed a very well arranged demonstration of various types of fire fighting equipments and facilities developed by you on 15th Dec., 94 where all the fire & safety experts from various oil industry organisations including OISD, IOC and EIL were present. We witnessed the demonstration of the various products and found to be very effective in controlling the fire.

It is needless to mention that all these products could be immensely useful for oil industry both up-stream as well as down-stream and specifically for refineries, pipelines installations, marketing installations etc. A few of the equipments demonstrated like foam float systems for floating roof tank fire, foam flooding system for gantries, Haz-Chem nozzle for 3 dimensional fire are worth mentioning.

We have been in dialogue with OISD regarding usefulness of these equipment and should be considered for inclusion in the OISD standards for fire fighting in oil installations, refineries etc. A multi-purpose fire fighting skid having facilities of fighting fire with foam and DCPs incorporating oscillating monitors were also demonstrated and found to be quite useful for various locations in the Marketing Division's oil terminals as well as in the refineries.

पंजीकृत कार्यालय : जी-9, अली यावर जंग मार्ग, बान्द्रा (पूर्व), बम्बई-400 051 (भारत)
Regd. Office : G-9, Ali Yavar Jung Marg, Bandra (East) Bombay-400 051 (India)

We hope that these products would be used by the oil industry for fire protection and fire fighting. In Indian Oil Corporation also we would like to install some of these equipment in near future.

Wish you all success in developing these products as import substitutes.

Thanking you,

Yours faithfully,

(B.B. Chakravorty)
General Manager (S&EP)
