Dated : 18.08.2020

Dear *Sh. Nalin*,

I would like to thank you for the support extended to me during my recent visit to Surat and Baroda Fire Brigade by arranging a demonstration of state-of-art equipment at your training Centre developed by your organization such as High Volume Long Range Monitor of 40,000 Lt./ minute capacity, Remote Operated Variable Flow Monitor, Centralized Fixed Foam Feeding System, Nitrogen Gas Injection System for Transformer Fire Protection, Rim Seal Fire Protection System for Floating Roof Tank, Light Weight Aluminum Fire Extinguishers, Automatic Fire Detection and Suppression System for Passenger Bus, Automatic Heat Detection-cum-Suppression System for Electrical Panel, Fire Robot etc.

2. I am impressed and surprised to note that you have already obtained BIS and UL approvals on your equipment. I, being a Chairman of CED-22 and Member of other BIS Committees would like to invite you and your expert engineers to contribute in BIS meetings and upgrade existing National Standards besides formulation of new standards.

3. The training and demonstration facilities at Baroda can be used to conduct national level specialized training courses pertaining to the Hydro-carbon Industries under public-private partnership schemes. I am sure, the partnership will not only provide the certified and recognized training courses to the experts in Hydro-carbon Industries but also save huge national property required to be created facilities at National Fire Service College, Nagpur. The available training facilities will definitely help the trainees to understand the concept of fire fighting in hydro-carbon industries besides hands on training on actual facilities available at training center.

4. I am looking forward for further discussion, your participation and sharing of knowledge for the benefit in development of standards, codes and training facilities.

With regards,

Yours sincerely,

D. K. Shami
