

THE FIRE EXPERTS

**UL LISTED INERT  
GAS BASED CLEAN  
AGENT FIRE  
EXTINGUISHING  
SYSTEMS**

RESEARCH • DEVELOP • INNOVATE

# **VINEREX by Vimal Fire (SHOOTFIRE) is a UL listed Inert Gas Fire Extinguishing System** that helps you save time and improves productivity.

VINEREX has done the compatibility, performance testing and certification.  
The system is ready to configure and install. The patented constant flow pressure regulator technology helps improve safety.  
Safe, Effective and UL listed.

## **CONSTANT-FLOW PRESSURE REGULATOR TECHNOLOGY**

VINEREX systems use constant-flow pressure regulators that modulate the discharge pressure to a constant 40-60 bar which still delivers the design concentration within 60/120 seconds, but with significant performance benefits: -

### **BETTER SAFETY**

- Prevents discharge freeze-up
- Prevents explosive force of discharge

### **SAVES TIME AND IMPROVES PRODUCTIVITY**

- Enables ease of installation of low pressure (schedule 40) manifolds & pipe network

- Reduces the difficulty and cost of locating/ fitting pressure vents in the protected space

### **EASY MAINTENANCE**

- After a system discharge, simply remove the regulator, recharge, and reconnect. No reconditioning necessary
- Functional tests are possible even while the system is armed

VINEREX CONSTANT-PRESSURE TECHNOLOGY REDUCES DISCHARGE NOZZLE PRESSURE TO A CONSTANT 40-60 BAR

It eliminates the need for expensive high-pressure discharge manifolds and piping while still delivering the design concentration within 60 /120 seconds.
