

GET STRESS FREE WITH EASE OF TECHNOLOGY
FAST ACTION FIRE ALARM SYSTEM

VdS Germany Approved

FIRE ALARM SYSTEM

A fire Alarm device working together to detect and warn people through visual and audio appliances when smoke, fire, carbon monoxide or other emergencies. These alarms get activated automatically from smoke detectors and heat detectors or also get activated via manual fire alarm activation devices. Alarms can be either motorized bells or wall mountable sounders or horns. Our Fire Alarm System is robust, integrated with Detection and Suppression systems and the response if instant.

FEATURES:

- Maximum reliability and full redundancy for optimal security
- Modular, decentral design
- Networking for small-scale systems up to large-area networked comprehensive systems
- Well organised and easily understandable display and operation in the language of the country
- Simple, structured configuration with PC software
- Tested and Approved in compliance with current standards and directives (e.g. EN 54, VdS)
- Available in different sizes

EN54

BENEFITS:

- 100% Hot Redundant Hot Standby Integrated System.
- VdS Approved.
- Compliant EN-54 Standards.
